

CERTIFICAPROA IS A QUALITY EVALUATION SYSTEM FOR THE ANTIMICROBIAL STEWARDSHIP PROGRAM (PROA) TEAMS

STEP BY STEP

1

BEFORE APPLYING

The starting point is to check if you comply with the PROA teams Certification Standards. The annexes published on the Spanish National Action Plan on AMR (PRAN) website will greatly help.

If you hesitate, we recommend not starting the process yet because, if you don't meet the requirements to reach the Basic Category, **your user will be blocked for 6 months.**

Prioritize the **preparation of documents referred to the strategic benchmarks**, which you will have to submit during the self-certification process.

2

ABOUT THE DOCUMENTS FORMAT

The tool only allows the submission of documents in PDF format

The justification of every benchmark must be submitted as a **stand-alone document.**

Autonomous communities protocols and educational programs can be used to justify the adequacy of the Certification Standards of PROA teams.

The documents can be saved one by one before their submission for validation. It's not necessary to attach all the documents at the same time.
